

# Your children are unlikely to inherit any of the diseases we've tested

Being a carrier is common. This does not mean you have the disease.

Continue with your family planning. No further action is recommended.

Caroline is a carrier for

Your children are unlikely to have any of the diseases we tested

The donor is unlikely to be a carrier

Each of your children has a 50% chance of being a carrier for each of the diseases that you or your partner carry. When your children grow up it will be helpful to inform them of this possibility.

[Learn why](#)

Caroline	Children's Disease Risk	The donor
carrier 	<b>Cystic Fibrosis</b> Characterized by impaired lung and digestive function due to thick, sticky mucus. The disease typically worsens over time and currently has no cure. Your children are unlikely (0.0007%) to have this disease.	unlikely carrier 
You are unlikely to be a carrier of any of the other <a href="#">100 diseases tested</a> .		

## A counselor is always available

Still have questions? Review your results with a licensed genetic counselor. We are available 9am-5pm Monday through Friday.

## Send your report to your family or doctor

If you have siblings, they have 50% chance of being a carrier of the same diseases as you. Invitees will receive an email allowing them to view your report. You can revoke this access at any time.

Some siblings appreciate knowing this information, but some do not. [Consider these reasons before telling family.](#)

[Grant report access to...](#)

## Limitations

This test is not able to guarantee your children will or will not inherit a disease but rather provide awareness to the likelihood of a child having a disease tested for. [Read the limitations](#) of this test to understand what is and is not covered.
