Continue on with your family planning. No further action is recommended.

Each of your children is unlikely to have any of the diseases we test for. However, each child has a 50% chance of being a carrier of any of the same diseases as you and your partner. When your children grow up it will be helpful to inform them of this possibility.

Limitations

This test is not able to guarantee your children will or will not inherit a disease but rather provide awareness to the likelihood of a child having a disease tested for.

Read the limitations of this test to understand what is and is not covered.
